BRNO CITY GAMES

Best played in smaller groups of all ages

These city quests were created as part of the training course Smart tools: integrating AI into Erasmus+ projects, focusing on using AI in youth work. During the course, participants learned how to integrate AI tools into educational activities and applied this knowledge in practice by designing and creating the city quest games themselves.

AIM

To introduce the city of Brno in an interactive and engaging way through city quests that combine history, culture, and architecture.
